How services are Selected and Authorized

Community Care's Family Care program is responsible for helping you achieve your desired outcomes through the development and implementation of your individualized care plan. Care plans are created using the Resource Allocation Decision Method (RAD). The RAD will help you and your Team identify your needs and the services necessary for you to achieve your outcomes. Authorized services must help you achieve your outcomes and be cost effective. Your Team is responsible for authorizing all services. For more specific information, consult your Member Handbook.

Using the Provider Network

Community Care's Provider Network includes a broad range of long-term care providers committed to helping you achieve your outcomes. You and your Team will access these providers when implementing your care plan.

Out of network providers may be used when Network Providers:

- Do not have capacity or expertise to meet your need.
- Cannot meet your need on a timely basis.
- Cannot meet your cultural or languages needs.
- Cause an undue hardship because of geographic location or accessibility.

This directory is only for members that meet the Nursing Home Level of Care.

Self-Directed Supports

Self-Directed supports (SDS) are a way for you to arrange, purchase and direct your long-term care services. In SDS, you have flexibility and control because you assume the responsibility for managing your services.

If you chose SDS, you would work with your Team to establish a budget for services based on your care plan. You would be responsible for purchasing and managing those services within your established budget. Please see the SDS guidebook for a complete description of benefits and limitations.
